

# Second Chance

## Endorsements

Two United States Congresswomen have endorsed *Second Chance: The Story of a Father's Faith, a Mother's Strength, and a Child's Will to Live*.

Representative Diana DeGette of Colorado wrote a special introductory letter to the book stating the importance of the project to her cause of food safety regulation reform. DeGette met the author in 2007 when they participated together in food safety discussions she hosted in Colorado.

Kip and Chance's story is a solemn reminder to us all of the thousands who fell sick or who died as a result of faulty gaps and holes in our nation's food safety system.

—Dianna DeGette

Representative Lynn Jenkins of Kansas has been a friend of the author for over fifteen years and contributed the foreword to the book. In it she recalls a conversation she had with Kip when she was first deciding to run for Congress and reminisces on how Chance's story affected her as a friend and mother.

I am very proud of Kip for having the courage to share his story. I believe this book will have a strong impact on parents and families everywhere.

—Lynn Jenkins
